SKILLS

- Frontend: VueJS, Tailwind, Flutter
- Backend: REST API & Authentication (Express / JWT)
- Tools: Github & Figma
- Database: MySQL & Supabase
- Soft Skills: Fast Learner, Team Work, Problem Solving

EXPERIENCE

Freelance Web Developer

CV Semangat Mandiri – Tangerang, Indonesia

Jan 2020 – Present

- Designed and developed landing page websites for companies in the General Supplier and Manufacturing Workshop sectors using Vue.js, Tailwind CSS, and Formspree.
- Collaborated with the marketing team to structure page layouts and content in alignment with the company's brand identity.
- Built responsive and high-performance company profile websites for educational institutions, with a strong focus on page speed and user experience.
- Developed digital registration form systems for regional election purposes, including real-time data validation and secure data storage.
- Optimized websites to be SEO-friendly and fully compatible across various devices and screen sizes

ORGANIZATION

Community Contributor – TailwindCSS Channel

Web Programming UNPAS Discord Server | Remote

- Actively assisted community members in resolving issues related to Tailwind CSS, UI debugging, and best practices in interface design.
- Contributed to creating a supportive learning environment by answering questions, sharing references, and mentoring beginner developers.
- Provided technical support and guidance to other developers through discussions focused on Tailwind CSS implementation.

PROJECTS

AdoptMe – Web-Based Animal Adoption Platform

- User authentication system (registration and login).
- CRUD features for managing animal data.
- Client-side routing and pagination for smooth navigation.
- Database integration for adoption data management.
- Responsive design optimized for both desktop and mobile devices.

Tech Stack: Vue.js, Tailwind CSS, Laravel, MySQL

Demo: <https://youtu.be/iLfiYKkehxs>

Cafe Web Application – Online Ordering System

- Developed a web-based cafe ordering application with user authentication sign up and sign in.
- Implemented menu selection and ordering features for customers.
- Client-side routing and pagination for smooth navigation.
- Built an admin dashboard to manage products, including adding, editing, and deleting menu items.
- Implemented a revenue monitoring feature in the admin dashboard to track incoming sales.
- Integrated a payment flow via WhatsApp for order confirmation and transaction handling.

Tech Stack: Vue.js, Tailwind, PostgreSQL
